2018 PRODUCT CATALOG

OUR STORY

IN 2001, TGC SET OUT TO CHANGE THE INDUSTRY.

In the past, necessary parts and products were purchased in small quantities from manufacturers. This led to long lead times and delays that bottlenecked operations. With this in mind, TGC formed a cooperative buying agreement with manufacturers for certain items, such as lightning arresters. By grouping our customers' most commonly used parts orders, TGC could command better pricing and quick lead times by keeping the product stocked on our shelves. TGC now stocks almost all products to be available for shipment in 24-Hours, allowing our customers to drastically reduce their inventory and keep their operations moving.

Continuing to focus on solving our customers' issues, we have taken various products and made improvements to the original manufacturers' design. We have made improvements to over 100 products in the last two decades and we continue to innovate today.

TGC sells parts and components to over 200 customers that repair or remanufacture electrical equipment. Our commitment is to provide parts with quick lead times at competitive pricing and exceptional customer service.

DID YOU KNOW...

TGC purchases surplus electrical equipment from customers wanting to move excess inventory. If you would like a quote on our in-stock units or are interested in selling surplus equipment, please contact us today.

COMMITTED TO PROVIDING PARTS WITH QUICK LEAD TIMES AT COMPETITIVE PRICING & EXCEPTIONAL CUSTOMER SERVICE.

Over the past 15-plus years, TGC has grown into the largest independent transformer parts distributor in the United States. This catalog includes our main products that we currently keep in stock. If there is any part that is not listed that is needed for your operation, please reach out to our customer service department for assistance in locating this product.

ENVIROTEMP[®] FR3[™] FLUID

TGC is a stocking distributor for FR3[™] Fluids. This fire-resistant, natural ester, dielectric coolant is specifically formulated for use in distribution and power transformers where its unique environmental, fire safety, chemical and electrical properties are advantageous.

ENVIROTEMP® FR3™ FLUID

As an internationally recognized fluids expert Cargill supplies Envirotemp® FR3™ fluid to utilities and transformer manufacturers around the world. FR3™ is an environmentally friendly, fire-resistant dielectric fluid used in a wide variety of liquid-filled electrical equipment installations in locations where exposure to people and property make fire safety a special concern.

Envirotemp® FR3™ fluid is designed for use in new and existing transformers, and also in refilling applications for mineral oil transformers. The revolutionary FR3™ fluid is the first dielectric coolant to have the Environmental Technology Verification (ETV) report issued by the United States Environmental Protection Agency.

Extremely reliable, FR3™ fluid has more than a decade of field experience in over 450,000 transformers around the world. Take a huge step in minimizing the impact your business has on the environment by simply switching to FR3 fluid; after all, it's only natural.

FR3'S IMPACT ON ASSET LIFE EXTENSION

Envirotemp® FR3™ fluid extends insulation life by a factor of as much as five to eight times because it has the unique ability to draw out retained moisture and absorb water driven off by aging paper. It also helps prevent paper molecules from severing when exposed to heat. These properties can result in an increase of overloadability and/or longer transformer insulation life, resulting in both lower-life cycle cost and delayed asset replacement.

FEATURES

- Bio-based, sustainable, natural ester dielectric coolant
- Formulated from seed oils and performance enhancing additives.
- Does not contain petroleum, halogens, silicones, corrosive sulfur, or any other questionable material.
- Listed in the US Federal BioPreferred® Program, making them readily identifiable as BioPreferred to all applicable Federal agencies.

BENEFITS

- Asset Life Extension
- Safety
- Environment
- Economics
